## Press Release

### JCM and the Credit Bank of Moscow Continue Fruitful Partnership

**DÜSSELDORF, Germany (4 May, 2021)** - JCM is happy to announce the continuation of their longterm partnership with the Credit Bank of Moscow (MKB), one of the top ten banks in Russia.

Since 2017, MKB have utilised the DBV-500 Bill Validator and TBV-100 from JCM in their operations for payment kiosks and deposit safes. JCM was originally selected three years ago thanks to rigorous testing for quality and functionality, winning out against other competitors in the automated cash transaction market.

Now, the continuation of this fruitful partnership comes as a result of JCM delivering robust and reliable products at a very competitive price point, which is highly valued by the Credit Bank of Moscow.

The DBV-500 bill validator offers an ultra-fast processing speed and state-of-the-art sensor, with the universal design supporting most major currencies without any hardware modification. The Transactional Bill Validator (TBV™) also has an impressive processing speed of just 1.7 seconds for fixed width notes along with advanced counterfeit detection, which makes it ideal for self-pay kiosks and banking operations. So it's no surprise that MKB's combination of these two solutions has proved so successful within their automated operations.

The Credit Bank of Moscow has been one of the top ten banks in Russia and ranks 6th by assets.
