## Press Release

### JCM TO DISPLAY THE LATEST IN RETAIL AUTOMATION AT EUROSHOP 2020

**DÜSSELDORF, Germany (07 February, 2020)** – JCM Global will be exhibiting a range of innovative products at this year's EuroShop, 16-20 February, giving attendees the chance to get a first-hand look at the latest in retail cash automation.

JCM will show the new UBA Pro Family, among many other exciting offerings, on display at EuroShop 2020, Hall 6, stand D75. This product suite is comprised of the cutting-edge UBA Pro bill validator, as well as two bill recyclers for two and four denominations – the UBA Pro-RT™ and UBA Pro-RQ™.

“The UBA Pro Family builds on JCM’s trusted cash management foundations, with both the UBA Pro-RT™ and UBA Pro-RQ™ boasting superior sensors for higher acceptance of street-grade notes and a faster note-to-note speed,” says Dragoljub Grekulovic, Head of New Products and Development/Global Product Manager EMEA.

“In addition, their compact and service-friendly design makes them ideal for the custom-facing retail environment — such as in self-checkout terminals and assisted checkout lanes, which are becoming increasingly popular globally.”

This innovative product suite isn't the only solution on display at Hall 6, stand D75, with JCM also exhibiting the MRX™ Modular Banknote Recycler. This fast and flexible solution is ideal for larger operations, with an escrow capacity of up to 30 notes, a recycler cassette capacity of up to 60 notes x 2 drums, and the ability to handle up to eight denomination if needed. What's more, the MRX™ has a rather unique 'retail mode' which helps speed up transaction time to reduce customer queuing. In addition to its frontend capabilities, the MRX™ is also extremely versatile in back-office cash automation — make sure to head to JCM's brand new stall at Hall 6, stand D75 to chat about how these solutions could help your retail business.

Visitors to EuroShop will also have the opportunity to see the iVIZION® bill validator, which processes banknotes faster than any other in its class with 100 % total image capture, as well as the RDM which offers an acceptance rate of 99% or more while processing 6 notes per second with advanced security functions such as dye stain detection, serial number reading and superior counterfeit detection. And for this year's EuroShop, attendees can experience it as it should be, with JCM offering an application example in cooperation with a renowned manufacturer of security solutions.

Other innovative solutions that attendees to Hall 6, stand D75 can explore are the, EBA-40, DBV®-500 and tbv™ bill acceptors/recyclers, which offer the security and reliability for which JCM is known

to any retail operation. In addition, the stand will be exhibiting the GSR50 and the F56 dispenser, with a compact design, multiple-denomination dispensing and high-capacity storage.

“We look forward to welcoming visitors to our stand D75 in Hall 6 at EuroShop, which is a strategically important show for JCM Global and a great way to start 2020,” adds Dragoljub Grekulovic.
