Part No: 701-000134

Description: WBA Solenoid Replacement Kit

Usage: This assembly makes up the mechanical anti-pull-back feature on the WBA transport. This feature adds an extra level of security in addition to our advanced optical sensor technology.

Note: JCM Engineering developed this kit to replace the solenoid assembly in WBA models manufactured before 1998. The design change was made to the existing optical switch as a replacement, and also upgraded the solenoid lever from a non-locking to a locking style to increase security.
