Parts are Parts

Part No. 038263

Description: Thumbscrew - M3

Usage: Two of these thumbscrews are used to secure the DBV-14X and DBV-200 SS transports to the frame.

Note: These thumbscrews are extremely important for the proper operation of the SS style unit. The thumbscrews secure the transport to the frame, and keep it from being torqued out of alignment when the stacking mechanism is attempting to stack bills. If the thumbscrews are missing or broken off, it could cause stacker problems or bill jams.

Customer Notifications/Tech Tips

Question: What's the difference between the various WBA models?

Answer: The JCM WBA (World Bill Acceptor) includes 10 different models: WBA-10/20, WBA-11/21, WBA-12/22, WBA-13/23 and WBA-24/25. The 10, 11, 12, and 13 bill heads are identical and interchangeable, for use in the U.S. domestic market. The 20, 21, 22, 23, 24, and 25 bill heads are also identical and interchangeable, for use in the international market.

The differences in the transports are listed below:

- WBA-10/20:** One Meg Flash EPROM, features one serial port, and uses a 12-pin external connector on the transport.
- WBA-11/21:** One Meg EPROM, features one serial port, and uses a 12-pin external connector on the transport.
- WBA-12/22:** Four meg Flash EPROM, features two serial ports, the ICB (Intelligent Cash Box) option, and uses a 20-pin external connector on the transport.
- WBA-13/23:** Four meg EPROM, features two serial ports, the ICB (Intelligent Cash Box) option, and uses a 20-pin external connector on the transport.
- WBA-24:** Euro Currency, Four meg Flash EPROM, features two serial ports, the ICB (Intelligent Cash Box) option, and uses a 20-pin external connector on the transport.
- WBA-25:** Euro Currency, Four meg EPROM, features two serial ports, the ICB (Intelligent Cash Box) option, and uses a 20-pin external connector on the transport.
